

Ince Resource Recovery Park Environmental Statement Table Of Contents

1	INTRODUCTION	
1.1	Background Information and Definitions	3
1.2	Planning History	3
1.3	Revised Environmental Statement	5
1.4	Project Team	5
1.5	The Applications	6
1.5.1	Competent Authority	6
1.6	Environmental Impact Assessment	7
1.6.1	Legislative Framework	7
1.6.2	EIA Process	8
1.6.3	Screening	10
1.6.4	Scoping	10
1.6.5	PPC Consent	11
1.7	Consultations and Surveys	11
1.7.1	Statutory & Non-Statutory Consultees	11
1.7.2	Public Consultation	13
1.8	Assumptions and Technical Difficulties	13
1.9	Evaluation of Significance	13
1.10	Approach to Mitigation	15
1.11	Cumulative Assessment Methodology	16
1.12	Content of the Environmental Statement	16
2	PROJECT DESCRIPTION	
2.1	Introduction	4
2.2	Project Overview	11
2.3	The Development Site	12
2.3.1	Location	12
2.3.2	Land Use & Landscape	14
2.3.3	Settlement	14
2.3.4	Access and Transportation	14
2.4	Refuse Derived Fuel Plant	15
2.4.1	Core elements of the RDF Facility	15
2.5	Integrated Waste Management Facility	20
2.5.1	Incoming Waste Handling Facility	20
2.5.2	Mechanical Biological Treatment Plant (MBT)	20
2.5.3	Segregated Materials Recovery Facility (MRF)	22
2.5.4	In-Vessel Composting Facility	23
2.5.5	Commercial & Industrial Waste Transfer Station	25
2.6	Environmental Technologies Complex - CCC Application	26
2.6.1	Dry Cargo Facility, Rail Line and Read Head	26
2.6.2	Ethanol Facility	27
2.6.3	Block-Making	29
2.6.4	Soil Treatment	30

2.6.5	Plastics Village	30
2.6.6	Wood and Timber Recycling Facility	31
2.6.7	Waste Electrical and Electronics Equipment (WEEE)	32
2.6.8	Water Treatment Plant	33
2.6.9	Resource Recovery Village and Business Centre	34
2.7	Associated Features	34
2.7.1	Sustainable Drainage System (SUDS)	34
2.7.2	Ecological Mitigation Areas	35
2.7.3	Community Ecological Park - CCC Application Only	35
2.7.4	Site Landscaping	36
2.7.5	Vehicular Access & Car Parking –Both DBERR and/or CCC Applications	36
2.8	Phasing and Construction	37
2.8.1	Overall Strategy & Timescales	37
2.8.2	Construction Activities	39
2.8.3	Creation of Ecological Mitigation Areas	40
2.8.4	Removal of Existing Services	40
2.8.5	Topsoil Stripping and Groundworks	41
2.8.6	Site Infrastructure	42
2.8.7	Building Construction	42
2.8.8	Canal Berth Construction	42
2.8.9	Construction Management	43
2.9	Site Design	43
2.9.1	Sustainable Design	44
2.9.2	Lighting	45
2.10	Site Infrastructure and Management	47
2.10.1	Services & Drainage	47
2.10.2	Health & Safety Considerations	47
2.10.3	Site Management	48
2.10.4	Site Security	48
3	POLICY	
3.1	Key Policies	4
3.1.1	Planning Policy Statement 10	5
3.1.2	Regional Spatial Strategy 2003(RSS13) and Regional Waste Strategy 2004	6
3.1.3	Emerging Regional Spatial Strategy	6
3.1.4	Planning Policy Guidance 13	8
3.1.5	Planning Policy Statement 22	8
3.1.6	Energy White Paper – May 2007	8
3.1.7	Waste Strategy 2007	10
3.1.8	Municipal Waste Strategies (and associated technical reports)	12
3.1.9	Cheshire 2016 Structure Plan Alteration (March 2006)	12
3.1.10	Ellesmere Port & Neston Borough Council Local Plan (2002)	13
3.1.11	Cheshire Replacement Waste Local Plan (adopted 2007)	13
3.1.12	Conclusion on Key Policies	14
3.2	Detailed Policy Assessment: Introduction & Legislative Background	16
3.3	Waste Policy – Detailed Analysis	16
3.3.1	National Context	16
3.3.2	Regional Context	18

3.3.3	Cheshire Replacement Waste Local Plan Context	19
3.3.4	Waste Policy Analysis	19
3.4	Renewable Energy Policy – Detailed Analysis	28
3.4.1	Summary of Renewable Energy Policy	32
3.5	Planning Policy – Detailed Analysis	32
3.5.1	National Planning Guidance	32
3.5.2	Regional Planning Guidance for the North West – RPG 13 (March 2003)	35
3.5.3	Draft RSS for the North West (January 2006)	38
3.5.4	Cheshire 2016 – Structure Plan Alteration	43
3.5.5	Ellesmere Port & Neston Borough Council Local Plan	45
3.5.6	Supplementary Planning Guidance	48
4	NEED	
4.1	Introduction	3
4.2	Need for the Refused Derived Fuel Plant	9
4.2.1	Summary of Need for the RDF Plant	9
4.2.2	Overview: Municipal Waste Management Contracts	10
4.2.3	Quantitative Need: RDF sourced from Municipal Waste	13
4.2.4	Overview: C&I Waste Management Contracts	18
4.2.5	Quantitative Need: RDF sourced from C&I Waste	21
4.2.6	Summary	25
4.2.7	Locational Need	25
4.2.8	RDF Locational Benefits and Links to Other RRP Uses	26
4.2.9	RDF Economies of Scale	28
4.2.10	Best Option	29
4.3	Need for the Integrated Waste Management Facility	35
4.3.1	Municipal Solid Waste	36
4.3.2	Industrial and Commercial Waste	37
4.3.3	IWMF: Inputs, Outputs and Synergies	37
4.4	Need for the Environmental Technologies Complex	38
4.4.1	Introduction and Policy/Legislation	39
4.4.2	Industrial Ecology	41
4.4.3	Industrial Symbiosis	41
4.4.4	Business Clustering	42
4.4.5	Eco Industrial Park	43
4.4.6	Individual ETC Uses	46
4.5	Summary: Need for the RRP and Its Component Parts	55
4.5.1	Summary of RDF Plant Need	55
4.5.2	Summary of IWMF Need	56
4.5.3	Summary of ETC Need	56
4.5.4	Overall Needs	56
4.5.5	Synergies	57
4.5.6	Conclusion	60
5	ALTERNATIVES	
5.1	The Requirement to Consider Alternatives and the Sequential Approach	2
5.2	Alternative Site Assessment - Introduction	3
5.3	Defining the Assessment Criteria	3

5.3.1	Area of Search	4
5.3.2	Size of Sites Considered	4
5.3.3	Type of Sites Considered	6
5.3.4	Sources of Information and Consultation Undertaken	6
5.3.5	Identified Characteristics	6
5.3.6	Sequential Approach to Flood Risk	9
5.4	Methodology of Assessment	10
5.5	Cheshire Replacement Waste Local Plan Allocations	12
5.6	Summary of Potential Alternatives	15
5.7	Summary of Alternative Site Assessment	35
5.8	Other “Alternatives” and the “Do-Nothing” Scenario	35
5.8.1	Disaggregation	35
5.8.2	Do-Nothing	35
5.9	Options under the Optional Appraisal for the RDF	36
5.10	Conclusion	36
6	GEOLOGY AND SOILS	
6.1	Introduction	2
6.2	Study Methodology	2
6.2.1	Scope of Study	2
6.2.2	Assessment of Significance	3
6.2.3	Magnitude of Impact	3
6.2.4	Sensitivity of Receptors in the Physical Environment	3
6.2.5	Potential Significance	3
6.2.6	Phased construction of the developments	4
6.3	Establishment of Baseline Environment	4
6.3.1	Geology	4
6.3.2	Soils	5
6.3.3	Ground Contamination	6
6.3.4	Sensitivity of Receptors	9
6.3.5	Characteristics of Proposed Developments	9
6.4	Identification and Assessment of Potential Impacts	12
6.4.1	Construction	12
6.4.2	Operation	15
6.5	Mitigation Measures	17
6.5.1	Construction	17
6.5.2	Operation	19
6.6	Cumulative Impacts	20
6.7	Predicted (Residual) Impacts	21
7	HYDROLOGY AND HYDROGEOLOGY	
7.1	Introduction	3
7.1.1	Existing Environment	3
7.1.2	Characteristics of the Proposed Development	4
7.2	Study Methodology	5
7.2.1	Scope of Study – Flood Risk Assessment	5
7.2.2	Planning Policy	5
7.2.3	Drainage and Flood Risk Assessment	6

7.2.4	Calculations	6
7.2.5	Scope of Study – Water Quality Impacts	6
7.2.6	Pollution Prevention Guidance	7
7.3	Baseline	7
7.3.1	Hydrogeology	7
7.3.2	Hydrology & Water Quality	8
7.3.3	Drainage	9
7.3.4	Flood Risk	9
7.4	Construction Impacts	12
7.4.1	General Construction Impacts – All Applications	12
7.4.2	Hydrogeology	13
7.5	Operational Impacts	15
7.5.1	Hydrology	15
7.5.2	Flooding	21
7.5.3	Hydrogeology	26
7.5.4	General Site Operations	27
7.5.5	Site-Specific Impacts	27
7.5.6	Cumulative Impact	36
7.6	Mitigation Measures	37
7.6.1	Construction Mitigation Measures – All applications	37
7.6.2	Site Design & Operation Mitigation	39
7.6.3	Flood Risk	40
7.6.4	Watercourses and Groundwater	40
7.6.5	Building Design	41
7.7	Summary of Residual Impacts	41
7.7.1	Assessment of Significance	41
7.7.2	Residual Impacts Summary	43
8	AIR QUALITY	
8.1	Introduction	4
8.1.1	Background	4
8.1.2	Methodology	4
8.1.3	Sources of Atmospheric Emissions	5
8.1.4	Construction Impacts	7
8.1.5	Changes from the previous assessment	7
8.2	Air Quality Standards, Objectives and Guidelines	7
8.2.1	Nitrogen Dioxide	8
8.2.2	Sulphur Dioxide	8
8.2.3	Particulate Matter	9
8.2.4	Carbon Monoxide	9
8.2.5	Hydrogen Chloride	10
8.2.6	Hydrogen Fluoride	10
8.2.7	Lead	10
8.2.8	Other Metals	10
8.2.9	Volatile Organic Compounds (VOCs)	11
8.2.10	Polycyclic Aromatic Hydrocarbons (PAHs)	11
8.2.11	Dioxins and Furans	11
8.2.12	Summary	12
8.3	Background Air Quality	13

8.3.1	Automatic Monitoring Stations (National)	13
8.3.2	National Nitrogen Dioxide Survey Results	14
8.3.3	National Smoke and Sulphur Dioxide Survey	15
8.3.4	National Modelling Data	15
8.3.5	Local Council Monitoring Stations	16
8.3.6	Quinn Glass Monitoring Stations	17
8.3.7	Other Pollutants	18
8.3.8	Contribution of Industrial Sources	20
8.3.9	Summary	21
8.4	Assessment of Impacts of DBERR Application	22
8.4.1	Initial Stack Height Calculation	22
8.4.2	Model Inputs	23
8.4.3	Results	27
8.4.4	Discussion of Results	30
8.4.5	Sensitivities	36
8.4.6	Health Impact Assessment	37
8.4.7	Sensitive Environmental Receptors	41
8.4.8	Other Potential Impacts	43
8.5	Assessment of Impacts of CCC Application	45
8.5.1	Odour Emissions	45
8.5.2	Assessment of Traffic Impacts	48
8.5.3	Assessment of Ethanol Boiler Impacts	51
8.6	Impact of Entire Development	53
8.6.1	Approach	53
8.6.2	Results	53
8.6.3	Discussion of Nitrogen Dioxide Results	54
8.7	Impact of Cumulative Development	55
8.7.1	Cumulative Impact of Other Plants	55
8.7.2	Cumulative Impact of Traffic from other developments	59
8.8	Greenhouse Gas Emissions	61
8.8.1	Introduction	61
8.8.2	Greenhouse Gas Emissions from the RRP	61
8.8.3	Conclusions	62
8.9	Mitigation Measures	63
8.9.1	Air Quality – Construction	63
8.9.2	Air Quality – Operation	63
8.9.3	Odour	63
8.10	Conclusions	64
9	LAND USE AND AGRICULTURE	
9.1	Introduction	3
9.2	Legislation and Policy Context	3
9.2.1	Key Legislation	3
9.2.2	Local Planning Policies	3
9.3	Assessment Methodology and Uncertainty	4
9.3.1	Establishment of Baseline Environment	4
9.3.2	Identification and Assessment of Impacts and Mitigation Measures	4
9.3.3	Uncertainty and Technical Difficulties Encountered	5
9.4	Baseline Overview	5

9.4.1	Current Land Use	5
9.4.2	Land Allocation and Management	5
9.4.3	Agricultural Land Classification (ALC)	6
9.4.4	Agricultural Operations	7
9.4.5	Agri-Environment Schemes	8
9.4.6	Notifiable Scheduled Diseases	9
9.4.7	Injurious Weeds	10
9.4.8	Invasive Species	10
9.4.9	Soils	10
9.5	Assessment of Impacts	10
9.5.1	Agricultural Operations	10
9.5.2	Agri-Environment Schemes	12
9.5.3	Notifiable Scheduled Diseases	13
9.5.4	Injurious Weeds	13
9.5.5	Invasive Species	13
9.5.6	Soils	13
9.6	Mitigation Measures	14
9.6.1	Agricultural Operations	14
9.6.2	Agri-Environment Schemes	14
9.6.3	Notifiable Scheduled Diseases	15
9.6.4	Injurious Weeds	15
9.6.5	Invasive Species	15
9.7	Cumulative Assessment	15
9.7.1	Proposed Developments	15
9.7.2	Recent Construction Developments	15
9.7.3	Development Allocations	16
9.8	Summary of Residual Impacts and Significance	17
10	ECOLOGY	
10.1	Introduction	1
10.2	Assessment Methodology	3
10.3	Survey Methodology	5
10.4	Baseline Conditions	8
10.5	Identification and Evaluation of Key Impacts (Pre & Post Mitigation)	23
10.6	Residual Impacts	56
10.7	Planning Policy Framework	64
10.8	Summary and Conclusions	68
11	ARCHAEOLOGY AND HERITAGE	
11.1	Introduction	4
11.2	Aims and Objectives	4
11.3	Legislation and Policy Context	4
11.3.1	Statutory Legislation	4
11.3.2	Non-statutory Protection	5
11.3.3	Structure Plan and Local Plan Protection	7
11.4	Method Of Assessment	7
11.4.1	Introduction	7
11.4.2	Study Area	7

11.4.3	Site Visit	7
11.4.4	Data Sources	7
11.4.5	Consultation	8
11.4.6	Field Evaluation	8
11.4.7	Gazetteer	8
11.4.8	Assessment Criteria	8
11.4.9	Limitations Of The Assessment	10
11.5	Baseline Overview	11
11.5.1	Introduction	11
11.5.2	Scheduled Ancient Monuments	12
11.5.3	Listed Buildings	12
11.5.4	Historic Parks and Gardens and Registered Battlefields	12
11.5.5	Conservation Areas	12
11.5.6	Non-Scheduled Archaeological Sites and Monuments	12
11.5.7	Archaeological Evaluation at Grinsome Farm	13
11.5.8	Site Visit	14
11.5.9	Aerial Photographs	14
11.5.10	Historic Landscape and Historic Map Regression	14
11.5.11	Archaeological Potential	15
11.6	Assessment of Archaeological Impact	16
11.6.1	Introduction	16
11.6.2	Summary of Generic Impacts	16
11.6.3	Site Specific Impacts of CCC Application	17
11.6.4	Site Specific Impacts of DBERR Application	18
11.6.5	Site Specific Impacts of Entire Site	18
11.6.6	Indirect Impacts of CCC Application, DBERR Application and Entire Site	18
11.6.7	Mitigation Measures	28
11.7	Residual Impacts	32
11.8	Cumulative Impacts	32
12	LANDSCAPE AND VISUAL IMPACT	
12.1	Introduction	3
12.2	Study Methodology and Uncertainty	3
12.2.1	Baseline Study	4
12.2.2	Landscape Assessment Criteria	4
12.2.3	Landscape Assessment Tables	5
12.2.4	Visual Assessment Criteria	6
12.2.5	Zone of Theoretical Visibility Study	7
12.2.6	Site Appraisal/ Photographic Studies/Photomontage	7
12.2.7	Visual Assessment Tables	8
12.3	Baseline Overview	10
12.3.1	Landscape Planning Policies	10
12.3.2	'Countryside Character Initiative' – The Countryside Agency	10
12.3.3	Mersey Valley	10
12.3.4	Shropshire, Cheshire and Staffordshire Plain	11
12.3.5	Cheshire Sandstone Ridge	12
12.3.6	Cheshire Landscape Assessment	12
12.3.7	Landscape Character of the Site and Its Surroundings	13
12.4	Assessment of Effects	16

12.4.1	Characteristics of the Proposed Development	16
12.4.2	Landscape Character Impacts During Construction	18
12.4.3	Visual Impacts During Construction	21
12.4.4	Landscape Character Impacts During Operation	22
12.4.5	Visual Impacts During Operation	22
12.4.6	Cumulative Landscape Effects	26
12.4.7	Viewpoint Analysis	26
12.5	Artificial Lighting Assessment	77
12.6	Mitigation	85
12.6.1	Site Layout	85
12.6.2	Architecture	85
12.6.3	Colour	85
12.6.4	Lighting	86
12.6.5	Planting	86
12.7	Summary of Residual Effects	88
12.7.1	Landscape Character	88
12.7.2	Visual Impact	88
12.7.3	Summary Findings	95
12.7.4	Worst-case Residual Visual Impacts	96
12.7.5	Conclusion of Landscape Character Assessment and Visual Impact	96
13	HUMAN AND SOCIO-ECONOMIC IMPACT	
13.1	Introduction	2
13.2	Assessment Methodology and Uncertainty	2
13.2.1	Identification and Assessment of Impacts and Mitigation Measures	2
13.2.2	Uncertainty and Technical Difficulties Encountered	3
13.3	Baseline Assessment	3
13.3.1	Sources of Information	3
13.3.2	Baseline Economic Review	4
13.3.3	Local Shops and Services	4
13.3.4	Tourism and Recreation	4
13.4	Assessment of Impacts and Proposed Mitigation	5
13.4.1	Economic Impacts	5
13.4.2	Development Viability	5
13.4.3	Construction Impact & Mitigation	7
13.4.4	Operational Impact	10
13.4.5	Total Employment Impact	11
13.4.6	Tourism and Recreation	12
13.5	Cumulative impacts	13
13.5.1	Economic Impacts	13
13.5.2	Tourism and Recreation Impacts	16
13.6	Summary of Residual Impacts and Significance	17
14	TRAFFIC AND TRANSPORTATION	
14.1	Introduction	3
14.1.1	Existing Environment	3
14.1.2	Characteristics of the Proposed Development	4
14.2	Study Methodology	5

14.2.1	Scope of Study	5
14.3	Planning Policy	6
14.3.1	European Union Policy – Railfreight	6
14.3.2	EU Policy – Short Sea Shipping	7
14.3.3	UK Government Transport Policy for Waterborne Freight and Rail Freight	8
14.3.4	Local Policy	10
14.4	Traffic Flow Assessment	14
14.5	Baseline	16
14.5.1	Intermodal Port	16
14.5.2	Ports with Dedicated Container Terminals	17
14.5.3	The Current Berth Facility	19
14.6	Rail Freight	19
14.6.1	UK Rail Freight Industry	19
14.6.2	Freightliner	20
14.6.3	English Welsh and Scottish Railway (EWS)	22
14.6.4	Direct Rail Services (DRS)	25
14.6.5	GB Rail Freight (GBRf)	25
14.6.6	Railfreight Operating Structure and Arrangements	27
14.6.7	Rail Passenger Facilities	27
14.7	Highway Traffic	27
14.7.1	Accessibility by Bus	28
14.7.2	Rail services	29
14.7.3	Accessibility by Pedestrian/Cyclist	30
14.8	Assessment of Impacts	31
14.8.1	Planning Policy	31
14.8.2	Entire Site	31
14.8.3	Freight Movements	31
14.8.4	The DBERR Application	32
14.8.5	The CCC Application	32
14.8.6	Total Material Generation and Modal Split	38
14.8.7	Impact on Shipping	44
14.8.8	Impact on Rail Traffic	44
14.8.9	Highway Trip Generation	45
14.8.10	Car Parking	46
14.8.11	Accident Analysis	48
14.8.12	Highway Link Flows	51
14.8.13	Junction Operation and Assessments	53
14.8.14	DBERR+CCC Application	54
14.8.15	Pedestrian/Cycle Trip Generation	57
14.9	Construction Impacts	58
14.10	Mitigation Measures	59
14.10.1	General	59
14.10.2	Pedestrian and Cycle Access	59
14.10.3	Public Transport	59
14.10.4	Vehicular Access	60
14.11	Summary of Residual Impacts	61
14.11.1	Assessment of Significance	61
14.11.2	Impact significance	61

15	NOISE	
15.1	Introduction	4
15.2	Relevant Standards and Guidance	4
15.2.1	PPG 24	4
15.2.2	BS 4142:1997	5
15.2.3	World Health Organisation: Guidelines for Community Noise	5
15.2.4	Calculation Of Road Traffic Noise (CRTN) 1998	6
15.2.5	BS 5228	6
15.2.6	Cheshire Planning Noise Guidelines	6
15.2.7	Ellesmere Port and Neston Local Plan GEN4	7
15.2.8	Determining the Significance of Impacts	7
15.3	Baseline Conditions	9
15.3.1	Environmental Noise Survey	9
15.3.2	Existing Ambient Noise Climate	11
15.3.3	Illustration of Ambient Noise Climate	11
15.4	Calculation of Predicted Noise Levels	12
15.4.1	Construction Noise Calculation	12
15.4.2	Operational Noise Calculation	15
15.4.3	Road Traffic Noise Calculation	23
15.4.4	Shipping Traffic Noise Calculation	25
15.4.5	Rail Traffic Noise Calculation	26
15.5	Assessment of Impacts	27
15.5.1	Construction Noise Impact Assessment	27
15.5.2	Operational Noise Impact Assessment	29
15.5.3	Road Traffic Noise Impact Assessment	34
15.5.4	Rail Traffic Noise Impact Assessment	36
15.5.5	Shipping Traffic Noise Impact Assessment	36
15.5.6	Habitat Impacts	37
15.6	Proposed Mitigation	39
15.6.1	Construction Noise Mitigation	39
15.6.2	Operational Noise Mitigation	41
15.6.3	Road Traffic Noise Mitigation	42
15.6.4	Rail Traffic Noise Mitigation	42
15.6.5	Shipping Traffic Noise Mitigation	42
15.7	Residual Impacts	43
15.7.1	Construction Traffic Noise – Residual Impacts	43
15.7.2	Operational Noise – Residual Impacts	43
15.7.3	Road Traffic Noise – Residual Impacts	43
15.7.4	Rail Traffic Noise – Residual Impacts	45
15.7.5	Shipping Traffic Noise – Residual Impacts	45
15.8	Cumulative Impacts	46
15.8.1	Construction and Operational Noise - Cumulative	46
15.8.2	Road Traffic Noise - Cumulative	46
15.9	Summary	48

16 CUMULATIVE IMPACTS, CONSEQUENTIAL DEVELOPMENTS AND IMPACT INTERACTIONS

16.1	Introduction	2
16.2	Cumulative Impacts	3
16.2.1	Approach to Assessment	3
16.2.2	Committed Developments	4
16.2.3	Non-committed Development and Allocations	8
16.3	Secondary / Consequential Developments	15
16.4	Impact Interactions	15
16.4.1	Methodology	15
16.4.2	Landscape	15
16.4.3	Physical Environment	16
16.4.4	Human Impacts	16
16.4.5	Ecology	16
16.4.6	Air Quality	18
16.5	Receptor Analysis	18
16.5.1	Potential Receptors	18
16.5.2	Settlements	18
16.5.3	Users of Recreational Routes	19
